The courses were Computer Programming (BIT10303) using C programming language, Object-Oriented Programming (BIT20603) using C++ programming language, and Java Programming (BIT33803). The rubrics were consistently used for grading lab assignments and group projects throughout the 14-week period of the semester.

Rubric Maker

Using Rubrics for Assessment. A rubric is an assessment tool that helps you articulate your expectations for student work, defining what will be assessed as well as describing the criteria for how it will be evaluated. By clearly expressing what excellence looks like, a rubric helps students understand what they need to work on.
